

## Javascript Tasks

1. Create a button that changes the background color when clicked.
2. Create a counter with **Increment** and **Decrement** buttons.
3. Show and hide a paragraph when a button is clicked.
4. Display an alert with the button's text when clicked.
5. Create a to-do list where clicking a button adds a new item.
6. Change the image source when a button is clicked.
7. Build a like button that toggles between "Like" and "Unlike".
8. Count how many times a button is clicked.
9. Create a form with a submit button and show the entered details on click.
10. Change the font size of text using increase/decrease buttons.
